

SUNY CORE GENERAL EDUCATION REQUIREMENTS

Introduction

All baccalaureate degree candidates at any college in the State University of New York (SUNY) system must complete a 30 credit-hour General Education requirement. More specifically, students must take at least one approved course in each of the 10 areas identified below. As a result of these requirements, students at Suffolk County Community College who plan to transfer to a SUNY four-year institution are expected to complete a minimum of 21 credits (7 courses) of the SUNY general education course requirements. In addition, students are strongly advised to satisfy the full 30-credit requirement prior to transfer.
